The time period for reply, if any, is set in the attached communication.

Office Action Summary		Application	Application No. Applicant(s)					
		10/092,57	1	STANNERS, SYD	STANNERS, SYDNEY DEVLIN			
		Examiner		Art Unit				
		Janice A. N	/looneyham	3629				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is in response to the applicant's communication filed on August 8, 2007, wherein:

Claims 9-26 are currently pending;

Claims 1-8 have been canceller;

Claims 9-26 are new.

Election/Restrictions

Newly submitted claim 26 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claim 26 is directed to a method for reducing prescribed medication error wherein a drug is selected from a list, patient records are selected form a list, using a bar code and bar code scanner for comparison, and comparing the patient checklist against the instructions provided with the dispensed drug.

Original claims 1-2, 4, 6, and 8 were directed to a prescription form which utilized a bar code scanning means.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 26 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 9-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 9 and 22 indicate that the invention is directed to a system. However many of the dependent claims are directed to method steps or further define the information.

First, it is not clear what statutory class claims 9-23 are directed to since the applicant further defines the system by method steps performed by the system or information being utilized in the system.

Secondly, MPEP 2114 states that an apparatus must be distinguished from the prior art in terms of structure rather than function.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 9-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Morey (US 2005/0182656) (hereinafter referred to as Morey).

Referring to Claims 9-23:

Morey discloses a system, comprising:

a computer system, wherein the system can be a personal digital assistant (Figure 1, paragraph [036]);

means for electronically transmitting a prescription form to a pharmacy (Figure 1 Internet; paragraph [0037]);

a bar code scanner (Figure 6 Optical input means –scanner Barcode readers);

a printer [0036-038].

wherein the transmission is encrypted [0032].

The intended use of a system does not distinguish over the prior art as long as the prior art system has the ability to so perform. The Examiner asserts that the system of Morey is fully capable of performing the intended use of applicant's invention.

Referring to Claims 24-25:

Morey discloses a method for reducing prescribed mediation errors, comprising:

providing a prescribing physician with a computer for accepting and storing prescription information on a patient [0036];

providing the prescription form to a pharmacy [0038];

comparing the bar code on the prescription form with the bar code on the medication [0043] [0048] [0050].

The language describing the prescription form and the reason for the form being printed the way it is printed is non-functional descriptive data.

When presented with a claim comprising descriptive material, an Examiner must determine whether the claimed nonfunctional descriptive material should be given patentable weight. The Patent and Trademark Office (PTO) must consider all claim limitations when determining patentability of an invention over the prior art. In re Gulack, 703 F.2d 1381, 1385, 217 USPQ 401,404 (Fed. Cir. 1983). The PTO may not disregard claim limitations comprised of printed matter. See Gulack, 703 F.2d at 1384-85,217 USPQ at 403; see also Diamond v. Diehr, 450 U.S. 175, 191,209 USPQ 1, 10 (1981). However, the examiner need not give patentable weight to descriptive material absent a new and unobvious functional relationship between the descriptive material and the substrate. See In re Lowry, 32 F.3d 1579, 1583-84, 32 USPQ2d 1031, 1035 (Fed. Cir. 1994); In re Ngai, 367 F.3d 1336, 1338, 70 USPQ2d 1862, 1863-64 (Fed. Cir. 2004). Thus, when the prior art describes all the claimed structural and functional relationships between the descriptive material and the substrate, but the prior art describes a different descriptive material than the claim, then the descriptive material is nonfunctional and will not be given any patentable weight. That is, such a scenario presents no new and unobvious functional relationship between the descriptive material and the substrate.

Application/Control Number:

10/092,571

Art Unit: 3629

The Examiner asserts that the data identifying the label and the reason for the label adds little, if anything, to the claimed acts or steps and thus do not serve as limitations on the claims to distinguish over the prior art. MPEP 2106IV b 1(b) indicates that "nonfunctional descriptive material" is material "that cannot exhibit any functional interrelationship with the way the steps are performed". Any differences related merely to the meaning and information conveyed through data which does not explicitly alter or impact the steps is non-functional descriptive data. Except for the meaning to the human mind, the data identifying the label and the reason for the label does not functionally relate to the substrate and thus does not change the steps of the method as claimed. The subjective interpretation of the data does not patentably distinguish the claimed invention.

Response to Arguments

Applicant's arguments with respect to claim 9-26 have been considered but are most in view of the new ground(s) of rejection. The applicant cancelled all of the pending claims and added new claims 9-26.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire

THREE MONTHS from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory

Application/Control Number:

10/092,571

Art Unit: 3629

action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Janice A. Mooneyham whose telephone number is (571) 272-6805. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (571) 272-6812. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
